

## Research Proposal

The proposal must say:

1. What the research is about? A description of the research issue.
2. How it will be undertaken? Methods, and other issues.
3. Why it is worthwhile? Why is the issue important or relevant.
4. How long it will take
5. Why it should be funded?

Basic structure:

1. Introduction
  - a. Describe the issue/ Objectives/ Relevance/ who will benefit
  - b. Research Question/ Hypothesis
2. Literature review
  - a. Just and indicative lit review.
3. Methods
  - a. Need to state the research framework (epistemology, ontology)
  - b. Methods:
    - i. Data collection process and its appropriateness
    - ii. Population and sampling
    - iii. Data analysis strategy
    - iv. Ethical issues
4. Dissemination
  - a. What you will do with the research
5. Timetable
  - a. Proposed timeline of the different stages
